

**Centers for Medicare & Medicaid Services (CMS)  
Provider Enrollment and Group Registration System Research**

We're conducting one-on-one feedback sessions for the Centers for Medicare & Medicaid Services (CMS), to evaluate their **provider enrollment and group registration systems**. As an organization with which we regularly discuss CMS programs relevant to your constituents, we're reaching out to you now to see if you could help us identify members who might be willing to participate in some current research. We're looking for:

- **Health care providers**
- **Credentialing and office staff**, including those who work for 3rd party vendors

During the session, we'll look at the following systems:

- For provider enrollment: Medicare's Identity and Access Management (I&A) system
- For group registration:
  - The CMS Portal's EIDM: Enterprise Identity Management System
  - PV-PQRS: Physician Value – Physician Quality Reporting System
  - GPRO: Group Practice Reporting Option
  - CAHPS: Consumer Assessment of Healthcare Providers and Systems

By participating in the session, participants will help CMS improve and streamline their processes. Sessions will be **90 minutes** and we will compensate both the participant and practice up to **\$500** for their time. Sessions can take place in person (if in the DC metro area) or remotely via screenshare. Sessions will take place:

- Tues, Aug 9 – Fri, Aug 12
- Mon, Aug 15 – Fri, Aug 19

If you have members who would be interested in participating, please let us know and we can put them in contact with our recruitment firm, **UserWorks**.

Thank you,

Jasmine Smith
